SAKSHYAM BARAL

Founder of Laayo · Full-stack developer

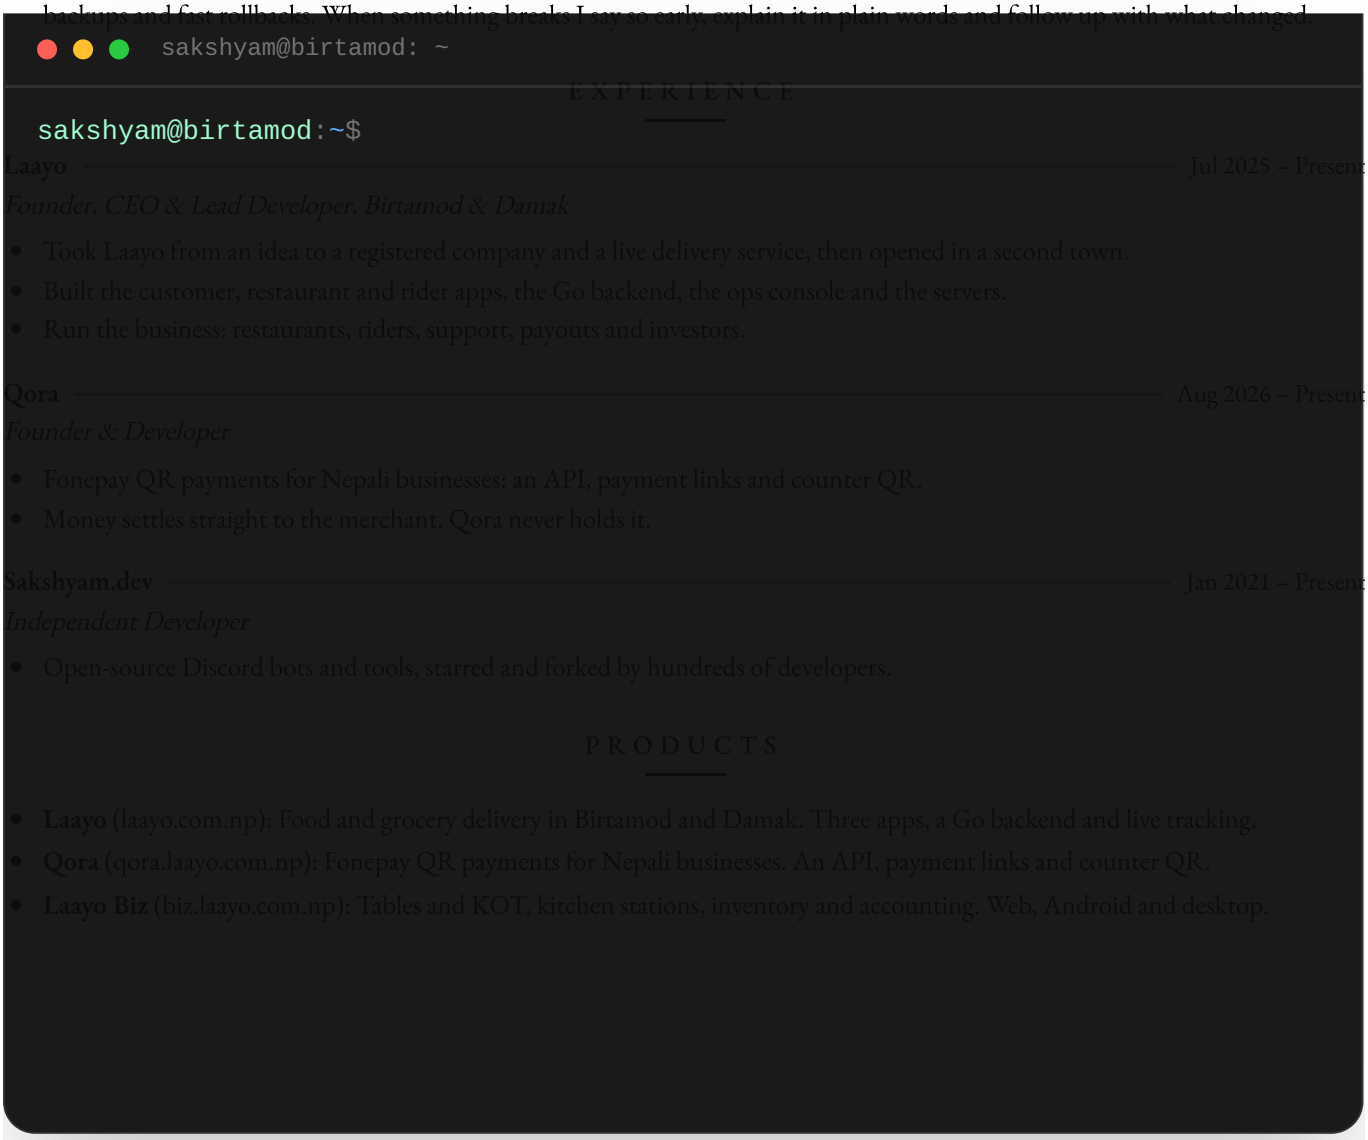

Kathmandu, Nepal · hello@sakshyambaral.com.np · sakshyambaral.com.np · github.com/SakshL · www.linkedin.com/in/sakshyam-baral-765b27363

PROFILE

Self-taught developer. I founded Laayo, food and grocery delivery in Eastern Nepal, and built nearly all of it: three mobile apps, a Go backend, the ops console, payments, live tracking and the servers it runs on. I also run the business. I'm now building Qora, payments for Nepali businesses.

HOW I WORK

- **Team management.** I lead the team behind Laayo: riders, store partners and the people who keep orders moving. I plan the week, split the work into clear tasks with one owner each, and keep everyone on one shared plan so nobody is stuck waiting. As Event Manager at JCI Nepal I run events with volunteer teams from plan to wrap-up.
- **Production-level code quality.** Every change goes from tests to staging to production, never straight to live. I write typed Go and TypeScript, keep code small and readable, review security on each feature, and watch errors and performance after every release.
- **Reliability and communication.** Laayo takes real orders and real payments every day, so I build for failure: health checks, alerts, backups and fast rollbacks. When something breaks I say so early, explain it in plain words and follow up with what changed.

EXPERIENCE

Laayo — Jul 2025 – Present
Founder, CEO & Lead Developer, Birtamod & Damak

- Took Laayo from an idea to a registered company and a live delivery service, then opened in a second town.
- Built the customer, restaurant and rider apps, the Go backend, the ops console and the servers.
- Run the business: restaurants, riders, support, payouts and investors.

Qora — Aug 2026 – Present
Founder & Developer

- Fonepay QR payments for Nepali businesses: an API, payment links and counter QR.
- Money settles straight to the merchant. Qora never holds it.

Sakshyam.dev — Jan 2021 – Present
Independent Developer

- Open-source Discord bots and tools, starred and forked by hundreds of developers.

PRODUCTS

- **Laayo** (laayo.com.np): Food and grocery delivery in Birtamod and Damak. Three apps, a Go backend and live tracking.
- **Qora** (qora.laayo.com.np): Fonepay QR payments for Nepali businesses. An API, payment links and counter QR.
- **Laayo Biz** (biz.laayo.com.np): Tables and KOT, kitchen stations, inventory and accounting. Web, Android and desktop.
